

# The Sustainability Data Company

Get automated sustainability data that has the same accuracy, speed and compliance as financial data.

Water | Waste | Energy | Emissions

## Data is the Hardest Challenge in Sustainability

Rounding up and preparing sustainability data takes far too long, putting reporting deadlines and audit schedules at risk. Inconsistent and incomplete data is a constant worry, as new penalties apply. Audit-ready data requires an expensive new system, tying up key resources for months.

## GLYNT is the All-In-One Sustainability Data Solution

GLYNT offers a complete suite of data services for water, waste energy and emissions. A single solution for varied formats and data types. Get customized data for seamless data flows to other business systems. Global coverage.

## Save Time and Money

GLYNT.AI's automated data services save hours of effort and payback in 3 – 5 months.

## Sustainability Data Your CFO Will Love

GLYNT.AI prepares sustainability data as rigorously as financial data. Our security, privacy, and compliance are at SOX levels (GLYNT.AI is SOC 1 certified).
